## VOCATIONAL SPEECH

**Sally Houston** gave a very interesting - and often amusing - vocational speech. **Sally** was the youngest of 7 children and recalled her days of being in a one-room school house. She received her BA in education, eventually settling in Vancouver. **Sally** and her husband, **Jack**, adopted 2 children, and she stopped teaching for 10 years but continued to be active in many volunteer situations. The couple were very interested in Canadian Art and spent many years pursuing this passion. **Sally** eventually went back to teaching and continued in this profession until her retirement. She shared with us her husband's struggle with cancer and his determination to walk again, which he did. These days **Sally** is still very busy with a variety of activities, one being the **Dream Auction**, hosted each year.
